

## ABOUT US

HMRITM meant for nurturing Technical Spirit - conceived in 2003, to provide exceptional facilities for students of Engineering and Technology, the HMR Institute of Technology and Management boasts of being among the reputed institutes even in its early stages. The Institute recognizes the need for bringing up a new age cerebral workforce in today's highly competitive environment.

It hence provides an atmosphere that ensures academic excellence and industry exposure that helps equip the students with the technical skills and emotional intelligence to successfully grapple with the complexities of a dynamic technology-driven environment. This endeavor is greatly aided by the location of the institute in Delhi that is home to several corporate houses and industries. HMR Institute of Technology and Management stands for quality embedded higher education at par with global and an excellent learning environment backed by innovative state-of-the-art infrastructure. Further, it aims to add greater value to the world of crucial engineering developments and technological breakthroughs through an active focus on research and development activities. With a bird's eye-view of all-encompassing development, it strives to achieve faster progress for students, for itself

**VISION** The HMR Institute of Technology & Management came into existence to provide technical education of the highest standards in the various fields of Engineering & Information Technology. In future, it aims to provide education in several other fields. One of the objectives of Institute is to participate in technology developments and breakthroughs the world over for generating additional employment opportunities for its students, Nationally & Internationally. HMRITM strives to achieve continuing progress for its students, for the national and for itself.

**MISSION** Our mission is to prepare the most competent and ingenious technocrats. Our foray into the world of Engineering and Technology is a means for facilitating higher education, training and research activities that affect the industrial development and economic growth of our nation. Simultaneously, it is our intent to contribute towards the goals of setting new trends internationally. We believe in power of education and we believe in imparting education thoroughly and impartially.
